TO ALL CDCs

Colson Services has recently implemented two enhancements to the CDC Online web site:

1. All data fields on the CDC Online Loan Detail web page will be refreshed nightly (i.e. borrower ACH bank information, borrower TINs, borrower names, etc.).
2. Regardless of a loan's status (i.e. active, deferment, catch-up) the "Curr Amt. Needed" data field on the CDC Online Loan Detail web page will always depict the current dollar amount needed to bring a loan current. As a result of the aforementioned enhancement, CDCs will be able to schedule voluntary prepayments and retrieve voluntary prepayment transcripts and letters directly from the CDC Online web site, for loans' in their portfolio with a deferment status (prior to this web site enhancement, CDCs were not able to obtain prepayment data for loans with a deferment status).

If CDCs have any questions related to the two CDC Online web site enhancements, please send an e-mail to 504department@colsonservices.com.

Thank you.

Sincerely,
Rich Ventura
Colson Services
